

# NGUYEN DUC ANH TUAN

## FRONTEND ENGINEER

(+84) 9172-701-00 | tuannnguyen25101999@gmail.com | GitHub: AnhhTuann

## SUMMARY

I am a Frontend Engineer with practical experience in designing and deploying web projects for diverse clients. I do not just write code, but I am also passionate about participating in the entire product creation journey, from translating ideas into designs to actual operation.

## PROFESSIONAL EXPERIENCE

### Freelance Frontend Developer (2021 - Present)

- **End-to-End Web Development:** Directly set up and deploy websites from scratch, using React, Vite, and specifically optimizing WordPress. Build SEO-standard E-commerce and Landing Pages, ensuring perfect responsiveness on all devices.
- **Aesthetic Mindset & SASS:** Utilize strengths in SASS/SCSS and an art background to build deep interfaces with "Cinematic" and "Moody" styles according to the unique requirements of each brand, instead of using generic templates.
- **Clean Code & Performance:** Committed to writing clean, maintainable code and optimizing page load speeds. Use quality control tools such as ESLint, Prettier, and version control via Git to ensure the product is always stable upon delivery to the client.
- **Applying AI to Workflow:** Integrate large language models to support content writing, debugging, and source code structure optimization, helping to shorten project deployment time by 30% while maintaining the highest quality.

# PROJECTS

## Belleza Lab (Artwork Analysis & Palette Generator Platform)

- **Description:** An AI-powered platform tailored for artists and designers that analyzes artwork mediums and textures, and automatically extracts detailed color palettes. Features a specialized virtual assistant named "Belle".
- **Technologies used:** React.js, Vite, SASS/SCSS, AI Model Integration.
- **Key responsibilities:** Designed the artistic and intuitive user interface; integrated AI models to parse image data, recognize art materials, and dynamically render color palettes based on user-uploaded artwork.

- <https://belleza-lab.vercel.app>

## Nexus CMS (Personal Web Portfolio)

- **Description:** A modern, highly responsive web portfolio system designed to showcase projects, skills, and personal information with a seamless user experience.
- **Technologies used:** React.js, Firebase (Firestore), Vercel.
- **Key responsibilities:** Built the core frontend architecture; configured data handling for smooth content updates and image management; successfully deployed and optimized performance.

- <https://portfolio-six-olive-38.vercel.app/>

## GenshinHub

- **Description:** A comprehensive database and utility web application for Genshin Impact players, providing detailed information on characters, weapons, and game mechanics.
- **Technologies used:** React.js, RESTful APIs, CSS/SASS.
- **Key responsibilities:** Implemented complex data fetching and state management to handle large datasets of game entities; built a responsive, visually appealing UI that aligns with the game's aesthetic; optimized localization/routing.
- <https://github.com/AnhhTuann/GenshinHub>
- <https://genshin-hub-rho.vercel.app/vi>

## Pokedex

- **Description:** An interactive web application that allows users to search, filter, and view detailed statistics and abilities of various Pokémon.
- **Technologies used:** React.js, PokeAPI, HTML5/CSS3.
- **Key responsibilities:** Integrated third-party RESTful APIs for real-time data fetching; applied asynchronous programming techniques to ensure smooth data loading; designed a clean, mobile-first interface.
- <https://github.com/AnhhTuann/pokedex>
- <https://pokedex-lilac-iota-88.vercel.app/>

## Gamehub :

- **Description:** A game discovery platform that allows users to browse and search for video games across different platforms and genres.
- **Technologies used:** React.js, RAWG Video Games Database API.
- **Key responsibilities:** Developed complex filtering and sorting functionalities; managed complex UI states and optimized component rendering for better performance.
- <https://github.com/AnhhTuann/gamehub>

## SKILLS (TOOLS)

- **Frontend:** HTML5, CSS3, SASS/SCSS, Javascript (ES6+), React.js, Vite.
- **CMS & Backend:** WordPress (Custom Theme), MySQL, basic PHP.
- **Tools & AI:** Gemini, Github Copilot, Git, Docker (Basic).
- **Operating Systems:** Linux (Manjaro, Arch-based), Windows.

## EDUCATION

### Sai Gon University (2017 - 2021)

- **Information Technology Engineer**
- **Certifications:** TOEIC (Score: 550)
