SKILLS

Frontend

HTML5 · CSS3 · SASS/SCSS · Tailwind CSS · JavaScript (ES6+) · TypeScript · React.js · Next.js · Vite · Zustand

Backend & Data

Node.js / Express · GraphQL (Apollo) · Prisma · PostgreSQL · MongoDB · REST APIs · WordPress · PHP (basic)

Tools & AI

Git · ESLint · Prettier · Docker · Vercel · Render · Gemini API · GitHub Copilot

Other

React Native (Expo) · i18n · Linux (Arch)

EDUCATION

Saigon University (SGU)
Engineer's Degree in Information Technology
2017 – 2021

LANGUAGES

Vietnamese	Native
English	TOEIC 550

NGUYEN DUC ANH TUAN

FRONTEND ENGINEER

Frontend Engineer with hands-on experience designing and shipping web projects for diverse clients. Beyond writing code, I enjoy owning the whole product journey — from turning ideas into designs to deployment and operation — with a strong eye for distinctive, brand-driven UI.

EXPERIENCE

Freelance Frontend Developer
2021 – Present

Self-employed · Remote

- **End-to-end web development:** build and deploy sites from scratch with React, Vite and WordPress — SEO-friendly, fully responsive e-commerce and landing pages.
- **Aesthetic mindset & SASS:** SASS/SCSS plus an art background to craft "Cinematic" and "Moody" brand-specific UIs instead of templates.
- **Clean code & performance:** write maintainable code and optimize page load speed; use ESLint, Prettier and Git so every delivery is stable.
- **AI-powered workflow:** LLMs for content, debugging and refactoring cut project delivery time by **~30%**.

PROJECTS

GenshinHub
Live · GitHub

Full-stack game wiki · Next.js 15 · TypeScript · GraphQL · Prisma · PostgreSQL

- Wiki for **125 characters**, weapons, artifacts and team builds across **29 routes** (admin CMS, auth, user profiles), localized in **14 languages** with next-intl.
- **Lighthouse performance 98 mobile / 100 desktop** (LCP 0.6 s) via static generation; GraphQL API on Render + Neon (14 models) and an Expo mobile app.

Elite PokéDex
Live · GitHub

Full-stack Pokémon encyclopedia · React 19 · TypeScript · GraphQL · Prisma · Zustand

- **3,700+ optimized WebP assets**, **13 routes** (Move/Item/Location Dex, auto Team Builder, PvP damage calculator, walkthrough CMS), 15-model schema seeded from PokéAPI; **Lighthouse performance 94** (desktop).

Belleza Lab
Live · GitHub

AI art analysis & palette generator · React · TypeScript · Vite · Gemini API · MUI

- Gemini analyzes artwork mediums and textures, extracts palettes and powers the "Belle" assistant; **Lighthouse performance 96 & SEO 100** (desktop).

GameHub
GitHub

Gaming e-commerce · React · TypeScript · GraphQL · PostgreSQL · C# WPF

- Storefront (cart, checkout, coupons, CD-key delivery) + admin dashboard on a 10-model schema, plus **2 C# desktop apps** for warehouse ops.

Nexus CMS
Live · GitHub

Portfolio + admin CMS · React 19 · TypeScript · Tailwind · Express · MongoDB

- Cinematic light/dark UI with a JWT-secured admin (projects, artworks, inbox) over **16 REST endpoints**; **Lighthouse accessibility 96**.
