

SUMMARY

I am a Frontend Engineer with practical experience in designing and deploying web projects for diverse clients. I do not just write code, but I am also passionate about participating in the entire product creation journey, from translating ideas into designs to actual operation.

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer

2021 – Present

- **End-to-End Web Development:** Directly set up and deploy websites from scratch, using React, Vite, and specifically optimizing WordPress. Build SEO-standard E-commerce and Landing Pages, ensuring perfect responsiveness on all devices.
- **Aesthetic Mindset & SASS:** Utilize strengths in SASS/SCSS and an art background to build deep interfaces with "Cinematic" and "Moody" styles according to the unique requirements of each brand, instead of using generic templates.
- **Clean Code & Performance:** Committed to writing clean, maintainable code and optimizing page load speeds. Use quality control tools such as ESLint, Prettier, and version control via Git to ensure the product is always stable upon delivery to the client.
- **Applying AI to Workflow:** Integrate large language models (Gemini) to support content writing, debugging, and source code structure optimization, helping to shorten project deployment time by 30% while maintaining the highest quality.

SKILLS (TOOLS)

- Frontend: HTML5, CSS3, SASS/SCSS, Javascript (ES6+), React.js, Vite.
- CMS & Backend: WordPress (Custom Theme), MySQL, basic PHP.
- Tools & AI: Gemini, Github Copilot, Git, Docker (Basic).
- Operating Systems: Linux (Manjaro), Windows.

EDUCATION

Sai Gon University

2017 - 2021

- Information Technology Engineer
- Certifications: TOEIC (Score: 550)
